Re: Student Internship

Dear Deepika Goda,

On behalf of ADTRAN Networks India Private Limited (hereinafter "Company"), I am pleased to submit to you this Letter of Agreement for Student Internship with the Company, in Hyderabad, upon the following terms and conditions:

Your proposed start date with ADTRAN is January 02, 2019, and has an anticipated end date of June 30, 2019. You will be acting under the supervision/mentorship of Srinivasu Varaha Satya Vaduguri, during this period. Your working hours shall be established by the mentor, but shall include the hours from 10:00 AM to 07:00 PM, Monday through Friday of each week.

During this period of internship, we will require you to assist in the maintenance of testing and development activities.

Please note, however, that it is possible that your Mentor may require you to work on a different project in addition to/substitution of the above referenced project, during the internship period, and you agree to perform such duties as may, from time to time, be assigned to you and shall comply with all reasonable directions given by the Company and its representatives.

During your internship with the Company, you shall observe and comply with all of the existing policies, rules, regulations and directives of the Company (including, at a minimum, its Global Anti-Corruption Policy and Code of Conduct, incorporated herein by reference) and as may from time to time be made or given. In its sole discretion, the Company shall have the right to alter and amend its policies, rules, regulations and directives, as well as any of the terms of your internship, and such alteration or amendment shall become fully effective and a binding term of your internship upon notification to you.

During your internship you will be paid a stipend of 20,000.00 INR per month and the same would be subject to deduction of applicable withholding taxes. Apart from the same, you are not entitled to any other compensation or employee benefits, including employee benefits such as pension or retirement plans, unemployment and health insurance. You are responsible for all of your expenses related to your student internship with the Company, unless the Company specifically agrees in writing, to reimburse you for any specific expense.

You represent that the work submitted by you to the Company shall be your own original work, or work for which you have full right, title and interest (including all intellectual property rights) and all rights to report the facts contained in your work. You further represent that the work submitted by you to the Company shall not have been published in any medium prior to its submission to the Company. By signing this letter, and in consideration for the opportunity to pursue your internship with the Company and the work that will be assigned to you, you agree without any further compensation beyond the stipend described above, to transfer to the Company all intellectual property rights -- and all other rights, title and interest -- to the assigned work, unless we have agreed otherwise in writing, and you further agree to do all that is necessary to assist the Company in protecting such rights.

As a student intern, you remain free to provide your services to the general public and/or other corporations, as long as it does not create a conflict of interest with the internship set out herein. If you perceive such a conflict - or realize that you have, in the past, been involved in some conflict that would adversely reflect on your work for the Company - you

must immediately notify the Mentor, and the Company shall then determine whether your internship can continue.

You shall not during the continuance of your student internship or, anytime after its expiry or termination, disclose, divulge, impart or reveal to any third party or company any Confidential Information. The term "Confidential Information" shall mean and include, without limitation, any and all tangible and intangible information, whether written, digital or oral information, and whether or not marked "Confidential", provided, disclosed, conveyed or communicated, in any manner, by the Company and/or the Company's subsidiaries, divisions, or affiliates ("Group Companies") and/or any of its/their clients/customers and/or suppliers, to you, including all documents, data, papers, statements, any and all business/client/customer information, trade secrets and process of the Company and/or its Group Companies or any of the clients/customers and/or suppliers of the Company and/or its Group Companies, and relating to its/their business practices, including information considered to be confidential and proprietary information of the Company and/or its Group Companies and/or any of the clients/customers and/or suppliers of the Company and/or its Group Companies and shall also include:

Re: Student Internship

Dear Naveen Khewji,

On behalf of ADTRAN Networks India Private Limited (hereinafter "Company"), I am pleased to submit to you this Letter of Agreement for Student Internship with the Company, in Hyderabad, upon the following terms and conditions:

Your proposed start date with ADTRAN is January 02, 2019, and has an anticipated end date of June 30, 2019. You will be acting under the supervision/mentorship of Bharat Kushawaha, during this period. Your working hours shall be established by the mentor, but shall include the hours from 10:00 AM to 07:00 PM, Monday through Friday of each week.

During this period of internship, we will require you to assist in the maintenance of testing and development activities.

Please note, however, that it is possible that your Mentor may require you to work on a different project in addition to/substitution of the above referenced project, during the internship period, and you agree to perform such duties as may, from time to time, be assigned to you and shall comply with all reasonable directions given by the Company and its representatives.

During your internship with the Company, you shall observe and comply with all of the existing policies, rules, regulations and directives of the Company (including, at a minimum, its Global Anti-Corruption Policy and Code of Conduct, incorporated herein by reference) and as may from time to time be made or given. In its sole discretion, the Company shall have the right to alter and amend its policies, rules, regulations and directives, as well as any of the terms of your internship, and such alteration or amendment shall become fully effective and a binding term of your internship upon notification to you.

During your internship you will be paid a stipend of 20,000.00 INR per month and the same would be subject to deduction of applicable withholding taxes. Apart from the same, you are not entitled to any other compensation or employee benefits, including employee benefits such as pension or retirement plans, unemployment and health insurance. You are responsible for all of your expenses related to your student internship with the Company, unless the Company specifically agrees in writing, to reimburse you for any specific expense.

You represent that the work submitted by you to the Company shall be your own original work, or work for which you have full right, title and interest (including all intellectual property rights) and all rights to report the facts contained in your work. You further represent that the work submitted by you to the Company shall not have been published in any medium prior to its submission to the Company. By signing this letter, and in consideration for the opportunity to pursue your internship with the Company and the work that will be assigned to you, you agree without any further compensation beyond the stipend described above, to transfer to the Company all intellectual property rights -- and all other rights, title and interest -- to the assigned work, unless we have agreed otherwise in writing, and you further agree to do all that is necessary to assist the Company in protecting such rights.

As a student intern, you remain free to provide your services to the general public and/or other corporations, as long as it does not create a conflict of interest with the internship set out herein. If you perceive such a conflict - or realize that you have, in the past, been involved in some conflict that would adversely reflect on your work for the Company - you

must immediately notify the Mentor, and the Company shall then determine whether your internship can continue.

You shall not during the continuance of your student internship or, anytime after its expiry or termination, disclose, divulge, impart or reveal to any third party or company any Confidential Information. Please note, however, that it is possible that your Mentor may require you to work on a different project in addition to/substitution of the above referenced project, during the internship period, and you agree to perform such duties as may, from time to time, be assigned to you and shall comply with all reasonable directions given by the Company and its representatives.

During your internship with the Company, you shall observe and comply with all of the existing policies, rules, regulations and directives of the Company (including, at a minimum, its Global Anti-Corruption Policy and Code of Conduct, incorporated herein by reference) and as may from time to time be made or given. In its sole discretion, the Company shall have the right to alter and amend its policies, rules, regulations and directives, as well as any of the terms of your internship, and such alteration or amendment shall become fully effective and a binding term of your internship upon notification to you.

Apart from the same, you are not entitled to any other compensation or employee benefits, including employee benefits such as pension or retirement plans, unemployment and health insurance. You are responsible for all of your expenses related to your student internship with the Company, unless the Company specifically agrees in writing, to reimburse you for any specific expense.

You represent that the work submitted by you to the Company shall be your own original work, or work for which you have full right, title and interest (including all intellectual property rights) and all rights to report the facts contained in your work. You further represent that the work submitted by you to the Company shall not have been published in any medium prior to its submission to the Company. As a student intern, you remain free to provide your services to the general public and/or other corporations, as long as it does not create a conflict of interest with the internship set out herein. If you perceive such a conflict - or realize that you have, in the past, been involved in some conflict that would adversely reflect on your work for the Company - you

must immediately notify the Mentor, and the Company shall then determine whether your internship can continue.

Re: Student Internship

Dear Aashritha Reddeddy,

On behalf of ADTRAN Networks India Private Limited (hereinafter "Company"), I am pleased to submit to you this Letter of Agreement for Student Internship with the Company, in Hyderabad, upon the following terms and conditions:

Your proposed start date with ADTRAN is January 16, 2018 and has an anticipated end date of June 30, 2018. You will be acting under the supervision/mentorship of Gouri Shanker Gunda, during this period. Your working hours shall be established by the mentor, but shall include the hours from 10:00 AM to 07:00 PM, Monday through Friday of each week.

During this period of internship, we will require you to assist in the maintenance of testing and development activities.

Please note, however, that it is possible that your Mentor may require you to work on a different project in addition to/substitution of the above referenced project, during the internship period, and you agree to perform such duties as may, from time to time, be assigned to you and shall comply with all reasonable directions given by the Company and its representatives.

During your internship with the Company, you shall observe and comply with all of the existing policies, rules, regulations and directives of the Company (including, at a minimum, its Global Anti-Corruption Policy and Code of Conduct, incorporated herein by reference) and as may from time to time be made or given. In its sole discretion, the Company shall have the right to alter and amend its policies, rules, regulations and directives, as well as any of the terms of your internship, and such alteration or amendment shall become fully effective and a binding term of your internship upon notification to you.

During your internship you will be paid a stipend of Rs.20,000.00 per month and the same would be subject to deduction of applicable withholding taxes. Apart from the same, you are not entitled to any other compensation or employee benefits, including employee benefits such as pension or retirement plans, unemployment and health insurance. You are responsible for all of your expenses related to your student internship with the Company, unless the Company specifically agrees in writing, to reimburse you for any specific expense.

You represent that the work submitted by you to the Company shall be your own original work, or work for which you have full right, title and interest (including all intellectual property rights) and all rights to report the facts contained in your work. You further represent that the work submitted by you to the Company shall not have been published in any medium prior to its submission to the Company. By signing this letter, and in consideration for the opportunity to pursue your internship with the Company and the work that will be assigned to you, you agree without any further compensation beyond the stipend described above, to transfer to the Company all intellectual property rights -- and all other rights, title and interest -- to the assigned work, unless we have agreed otherwise in writing, and you further agree to do all that is necessary to assist the Company in protecting such rights.

As a student intern, you remain free to provide your services to the general public and/or other corporations, as long as it does not create a conflict of interest with the internship set out herein. If you perceive such a conflict - or realize that you have, in the past, been involved in some conflict that would adversely reflect on your work for the Company - you

must immediately notify the Mentor, and the Company shall then determine whether your internship can continue.

You shall not during the continuance of your student internship or, anytime after its expiry or termination, disclose, divulge, impart or reveal to any third party or company any Confidential Information. The term "Confidential Information" shall mean and include, without limitation, any and all tangible and intangible information, whether written, digital or oral information, and whether or not marked "Confidential", provided, disclosed, conveyed or communicated, in any manner, by the Company and/or the Company's subsidiaries, divisions, or affiliates ("Group Companies") and/or any of its/their clients/customers and/or suppliers, to you, including all documents, data, papers, statements, any and all business/client/customer information, trade secrets and process of the Company and/or its Group Companies or any of the clients/customers and/or suppliers of the Company and/or it Group Companies, and relating to its/their business practices, including information considered to be confidential and proprietary information of the Company and/or its Group Companies and/or any of the clients/customers and/or suppliers of the Company and/or itsGroup Companies and shall also include:

CERTIFICATE

April 15, 2015

This is to certify that Ms. **Harita Tammana**, student of Computer Science with Roll-No-1602-11-733-071 at Vasavi College of Engineering, as part of her B.E course has completed her academic project in our organization from 05.01.2015 to 15.04.2015.

She was assigned to work on a project entitled **Warehouse Application Using Salesforce**. This application in the cloud is great as there is no server to configure, no software to install, and no ongoing maintenance of the infrastructure is needed. At the heart of this application is merchandise. This application automatically creates a data object that keeps track of all the elements of a particular merchandise item, such as its name, description and price. On the Salesforce platform, these data objects are known as custom objects. These objects come with standard fields and screens that allows the user to list, view, and edit information about the objects. The user can also add his own fields to track or list just about anything he likes to. It will give the user a working application with its own menu, a tab, and a custom object that tracks the name, description, and price of all merchandise, as well as screens that allows view and edit options to all the information.

Harita is a keen and quick learner and she has exhibited good knowledge and technical skills in the field. She has used Cloud Computing and Salesforce as tools in developing the application. She has displayed very good attitude towards work and she makes a good team player.

We wish her the best in her academic pursuit and for a brilliant career ahead.

hello Kranti Kumar,

Congratulations, I hear from Likhitha that you got an internship - that is really good news, good for you and wish you all the best. This is really a happy new year for you!

thx. Edwin

Kranti Kumar, Lithika, Sushma, Dinesh,

Hello, my name is Edwin. Madari and I was a lecturer in Vasavi a very long time back. Right now I am working in Verizon in the cell phone side and that too software development and the hardware to run our applications and apps. Unfortunately I cannot give you an url and or name of an app for you to go and see for yourself because I am in that part of the organization where we develop applications and apps for internal use only. In other words my/our applications and apps are used by customer care and other internal departments only, hence not visible/available outside to general public.

I am a hands on type of an individual, which means you name it, I most probably would have either used it directly or have had a good exposure to that language and or technology. When in it comes to education, I only have a bachelors in mechanical engineering and a bachelors in computers science. Sorry I do not have any masters degrees but possess vast experience and since I value education decided to help young engineers like yourselves with some of the today's challenges and opportunities out there in the field.

First things first - It was very kind of your head of the Department and your professor to meet with me last June when I was in HYB and agreed to take up one or two projects that I can come up with. Thanks to both of them for giving me this opportunity. And you are the chosen ones. So best of luck and would like to see you get started as soon as possible.

Next - my apologies for not getting in touch with you sooner even though your professor provided your contact info to me. I was tied up with what was going on with my work. Going forward will try to get back to you in reasonable time frame, since I know you would have to complete your project and graduate college on time.

Logistics:

1. your professor Mr. S. Vinay kumar will be your point of contact and direct all your questions to him. If he chooses to have you contact me directly then please go ahead.

2. Although emailing is the best way to get in touch with me, honestly I do not get to check my emails more than once or twice a week. Hence if you do email me, in addition to your email, please send another short email, 80 characters or less to 9145896651@vtext.com indicating that you have sent me an email and include your name and a brief reason.

3. Most of the time, any day between 6pm to 8pm Indian time (i.e., your evenings) I can call you or at any number you wish me to call. Let us have a conference call to begin with to kick off the project as soon as possible.

4.Depending on the need, if Skype or other modes of communication are needed, we will do it as needed.

Here is the summary of projects. Initially it will be beneficial if all you read the summary for both projects. Once things start moving then the two teams can separate out.

Membership Application

Project to involve Investigating and finding out if any membership application and or app exists and or available resources be used to wire together a membership application and or app or figure out a membership application or app where someone can start a membership application, allow members to sign up and join, provide administrative and user interfaces for editing/updating details, periodic and or scheduled emails to members, members forum, allow subscription dues to be collected, payment history to be viewed and allow non-members i.e., general pubic to a)contribute monetary or other materials and b)provide updates and or feed back. A best example I can think of is if someone wanted to start a Cricket club or what ever is the current popular game or past time over there in HYB.

This app/application could be used for for a temporary period, or start with a temporary nature as goal but could evolve to become permanent and should be able to absorb other group or groups if they so choose to join or communicate with. A web presence will be a must for this project, and figure out the logistics of naming and web domain.

Subscription Application / App:

Organizations, banks, and even stores are looking for people to sign up for various reasons. Some have started accepting email addresses for user ids and some institutions force users to change their password. Places where entering email addresses on paper is asked for are risking information falling into wrong hands. These organizations might want to gather or capture cell phone numbers or other pertinent information to promote their business or merchandise

Investigate and find out if any application and or app exists and or available resources can be used to wire together an app or application to come up with a solution which can work with any and all organizations that need it.

Thanks and all best

hello Mr. Vinay Kumar,

I saw your response to subscription application. Good to know that you and or your department deems it appropriate for your students. Next project has to do with the needs of any group of individuals who by virtue of a need, or goal, or ambition, or charity, or affiliation, or faith need to form/forum, allow/accept members and may raise money. For example a group of individuals wanting to form a cricket group or some one wanting to create a group for the purposes of making pilgrimage trip, etc.

To this affect - Project to involve Investigating and finding out if any membership application and or app exists and or available resources be used to wire together a membership application and or app or figure out a membership application of app where someone can start a membership application, allow members to sign up and join, provide administrative and user interfaces for editing/updating details, periodic and or scheduled emails to members, members forum, allow subscription dues to be collected, payment history to be viewed and allow non-members i.e., general pubic to a)contribute monetary or other materials and b)provide updates and or feed back.

2017-18

Mission RnD Program of 2018

Founded in the year 2012 by Mr. Srini Koppolu and Mr. Perraju Bendapudi on the belief that a large number of technically smart students also exist outside of India's Tier-1 engineering colleges, Mission RnD believes that with the right training, quality talent can be discovered to cater to product development roles.

Mission RnD's objective is "To contribute to the growth of India's R&D ecosystem by developing the most promising technology students, especially women, and by supporting the talent needs of product companies, including Start-ups."

Learning how to learn is one of the key skills that the students pick up during the program and this enables them to have a long and successful career in the constantly changing horizon of the software industry. They also acquire soft skills such as insights into team dynamics while working on projects. Interacting with the instructors and their fellow students from other colleges enables them to envision ideas from all perspectives.

Mission RnD Program of 2018 will have two major phases:

1. Preliminary Training:

   The preliminary will consist of three courses:

   a. C & Advanced C Course: (June 1st Week 2017 to January 1st Week 2018):

      Course Aim:

      We at Mission RnD strongly believe that, to be a great Systems Engineer, one has to be very efficient in C. We expect students to dive as deep as possible into the Internals of C during this course. Algorithm and Complexity Analysis will be an integral part of the course.

      Course Mode:

      Face to Face.

      This course will be run offline in two centres Visakhapatnam and Hyderabad. It is mandatory that the students who wish to enrol for the Mission RnD 2018 Program **MUST** attend the class in either of the centres. If you cannot come to either of the places, please do not enrol for the course.

      Frequency of Classes:

      We will have two classes every month on weekend or on holidays. So a total of 10-12 classes will be in-person.

      Evaluation: Students will be evaluated by the faculty in the class so it is essential that the students attend the in-person class.

   b. Professional Python Course:

      Course Aim:

      Students are taught to use a managed language and use it to build things as simple from a 'Hello World' to a GUI application. The choice of language for this is Python. This will course will be run online with an introductory in-person class for helping setup the development environment. The in-person class will be held at one of the two course centres mentioned above.

      Course Mode:

As a student intern, you remain free to provide your services to the general public and/or other corporations, as long as it does not create a conflict of interest with the internship set out herein. If you perceive such a conflict – or realize that you have, in the past, been involved in some conflict that would adversely reflect on your work for the Company – you must immediately notify the Mentor, and the Company shall then determine whether your internship can continue.

(v) any information divulged to the Company by a third party in confidence.

Your obligations with regard to Confidential Information are set out in Annexure 1 hereto.

You agree and acknowledge that neither the internship arrangement relationship contemplated herein nor this Letter of Agreement constitutes an offer of employment, employment relationship or agreement or entitles to you to any right or claim to employment with the Company or

its related, associated or affiliated companies, whether during or after the expiration, termination or cancellation of the internship. The sole purpose of the internship arrangement is to provide you with relevant experience and, thus, the Company shall, at will, either with or without cause, without any liability, be entitled to end your internship immediately without the need for written notice.

You also confirm that you are not subject to/party to any covenants, agreements or restrictions, including, without limitation, any covenants, agreements or restrictions arising out of any prior internship, employment or independent contractor relationships, which would be breached or violated by your undertaking this internship assignment with the Company.

In our internship relationship, you and the Company agree not to discriminate on the basis of race, creed, color, age, sex, national origin, sexual orientation, marital status, citizenship status or disability, in any manner. You also agree to avoid all forms of harassment. You are also required to abide by all applicable laws and regulations of India and applicable US laws, including but not limited to the Foreign Corrupt Practices Act, UK Bribery Act, the International Traffic in Arms Regulations, the Export Administration Regulations, and the U.S. anti-boycott laws. The arbitration panel shall be composed of a single arbitrator appointed in accordance with the Rules. In the event of any conflict between the Rules and this clause, the provisions of this clause shall govern. The arbitration shall take place in Hyderabad. The language to be used in the arbitration shall be English. The arbitration award shall be in writing and shall specify the factual and legal basis for the award. The arbitrator shall have no authority to award punitive or other damages not measured by the prevailing party's actual damages. An application for enforcement or execution of the award may be made in any court having jurisdiction over any party or its property, as the case may be. The Company will have the right to seek injunctive relief against yourself from any judicial or administrative authority of competent jurisdiction to enjoin you from breaching any provision of this letter pending resolution of a dispute by arbitration.

Further, your internship with the Company is subject to and conditional upon, among other requirements, (i) satisfactory completion of background verification and (ii) your execution of this Letter of Agreement on or by your joining date. If any of the aforesaid conditions are not met, then this Letter of Agreement shall stand revoked automatically and, if you have already accepted the offer of internship and/or commenced the internship with the Company, this Letter of Agreement and/or such internship shall terminate.

Re: Student Internship

Dear Sindhu Vanaparthi,

On behalf of ADTRAN Networks India Private Limited (hereinafter "Company"), I am pleased to submit to you this Letter of Agreement for Student Internship with the Company, in Hyderabad, upon the following terms and conditions:

Your proposed start date with ADTRAN is January 16, 2018 and has an anticipated end date of June 30, 2018. You will be acting under the supervision/mentorship of Bhadru Bhanothu, during this period. Your working hours shall be established by the mentor, but shall include the hours from 10:00 AM to 07:00 PM, Monday through Friday of each week.

During this period of internship, we will require you to assist in the maintenance of testing and development activities.

Please note, however, that it is possible that your Mentor may require you to work on a different project in addition to/substitution of the above referenced project, during the internship period, and you agree to perform such duties as may, from time to time, be assigned to you and shall comply with all reasonable directions given by the Company and its representatives.

During your internship with the Company, you shall observe and comply with all of the existing policies, rules, regulations and directives of the Company (including, at a minimum, its Global Anti-Corruption Policy and Code of Conduct, incorporated herein by reference) and as may from time to time be made or given. In its sole discretion, the Company shall have the right to alter and amend its policies, rules, regulations and directives, as well as any of the terms of your internship, and such alteration or amendment shall become fully effective and a binding term of your internship upon notification to you.

During your internship you will be paid a stipend of Rs.20,000.00 per month and the same would be subject to deduction of applicable withholding taxes. Apart from the same, you are not entitled to any other compensation or employee benefits, including employee benefits such as pension or retirement plans, unemployment and health insurance. You are responsible for all of your expenses related to your student internship with the Company, unless the Company specifically agrees in writing, to reimburse you for any specific expense.

You represent that the work submitted by you to the Company shall be your own original work, or work for which you have full right, title and interest (including all intellectual property rights) and all rights to report the facts contained in your work. You further represent that the work submitted by you to the Company shall not have been published in any medium prior to its submission to the Company. By signing this letter, and in consideration for the opportunity to pursue your internship with the Company and the work that will be assigned to you, you agree without any further compensation beyond the stipend described above, to transfer to the Company all intellectual property rights -- and all other rights, title and interest -- to the assigned work, unless we have agreed otherwise in writing, and you further agree to do all that is necessary to assist the Company in protecting such rights.

As a student intern, you remain free to provide your services to the general public and/or other corporations, as long as it does not create a conflict of interest with the internship set out herein. If you perceive such a conflict - or realize that you have, in the past, been involved in some conflict that would adversely reflect on your work for the Company - you

must immediately notify the Mentor, and the Company shall then determine whether your internship can continue.

You shall not during the continuance of your student internship or, anytime after its expiry or termination, disclose, divulge, impart or reveal to any third party or company any Confidential Information. The term "Confidential Information" shall mean and include, without limitation, any and all tangible and intangible information, whether written, digital or oral information, and whether or not marked "Confidential", provided, disclosed, conveyed or communicated, in any manner, by the Company and/or the Company's subsidiaries, divisions, or affiliates ("Group Companies") and/or any of its/their clients/customers and/or suppliers, to you, including all documents, data, papers, statements, any and all business/client/customer information, trade secrets and process of the Company and/or its Group Companies or any of the clients/customers and/or suppliers of the Company and/or it Group Companies, and relating to its/their business practices, including information considered to be confidential and proprietary information of the Company and/or its Group Companies and/or any of the clients/customers and/or suppliers of the Company and/or itsGroup Companies and shall also include:
